

4th January 2016

SUBJECT : THE BRADFORD DISTRICT PLAN
BRADFORD DISTRICT Community
INFRASTRUCTURE LEVY.

LS 29

Dear Sir,

Further to our letter dated 19 August 2015 we would like to comment further on the BRADFORD DISTRICT PLAN in the light of changing circumstances in recent months.

We believe all the factors listed in our previous letter should still be considered but need to be considered in the context of the various changes that are happening in relation to changes in our weather patterns.

The recent flooding situations have certainly increased the responsibility that now sits with you to ensure development of further housing is only allowed in 'safe' situations.

For 'safe' situations you are faced with considering the immediate impact, the 5/10 year impact and the long-term impact especially a warmer world and more probability of flooding.

Yours Sincerely

Grant
