

Table 4: Projected household and jobs increases - 2011-2030

Data from page 18 Bradford Housing Requirements Study – updated demographic analysis & forecasts, Edge Analytics, September 2014

| Projected household and jobs increases - 2011-2030 | | | |
|--|-------------------|-----------|----------|
| Scenario | Households change | Dwellings | New jobs |
| PG 10 Year A | 37,279 | 38,779 | 36,746 |
| SNPP – 2010 A | 31,304 | 32,547 | 31,806 |
| PG 5 Year A | 35,472 | 36,898 | 31,958 |
| Natural Change A | 35,649 | 37,069 | 28,500 |
| Jobs Led REM A | 32,712 | 34,029 | 29,184 |
| SNPP – 2012 A | 27,980 | 29,108 | 23,389 |
| | | | |
| PG 10 Year B | 46,824 | 48,697 | 36,746 |
| SNPP – 2010 B | 40,371 | 41,990 | 31,806 |
| PG 5 Year B | 44,766 | 46,550 | 31,958 |
| Natural Change B | 45,001 | 46,797 | 28,500 |
| Jobs Led REM B | 42,146 | 43,833 | 29,184 |
| SNPP – 2012 B | 37,250 | 38,741 | 23,389 |

Notes: Scenario clusters A and B represent different household headship rates. The A cluster purports to represent headship rates in an economic situation similar to the post-crash era and the B cluster those in the pre-crash era.

The New Jobs column figure for the Jobs led REM Scenarios represents a calculation relating to expectations of new jobs based on the REM figures available at 2014. The other figures relating to jobs appear to be unfounded.
