Summary:

I support measures that allow development that aims for zero carbon design, even if it uses materials that are different to the "traditional" building materials of Ilkley. I think we need to move with the times, not be stuck in the past. There is a climate emergency, and the beauty of our natural environment, plus our traditional built environment, is directly threatened by this emergency.

I would not be happy with increasing street lighting without consultation. Beverley Rise has older style lights which are generally low impact, I have seen some modern lights in other areas of England that are incredibly bright and tall and intrusive on the neighbouring houses, not to mention the detrimental impact they have on wildlife from light pollution

Agent:

Summary:

I fully support proposals for enhancing measures to improve cycling opportunities. I am keen for children to cycle but concerned about safety on Ilkley's roads. Cycle lanes? Close the Grove to cars?

All measures welcomed

Electric bike clubs sounds like a brilliant idea.

Also increasing provision of electric charging hubs - will be essential to meet demand over next 20 years

Support measures to promote public transport, in the town and linking in to other communities. e..g can't get a convenient bus to Airedale Hospital at present.

Summary:

Additional comment in regard to improving facilities for cycling - we need more places for bicycle parking please. The east end of Grove road would be useful e.g near the memorial garden, for use by residents on west side of town cycling in to use the Grove shops and facilities. Also more points on Bridge street

Summary:

I also support the Wharfedale Greenway proposals, and the introduction of wider 20 mph zones and/ or other traffic calming measures. Cars go too fast on Beverley Rise, Grove Road and Kings Road. I have on several occasions felt seriously concerned about my toddler's safety whilst we are walking along these streets, and certain cars, often vans, really accelerating past us with no care for pedestrians. The excessive speed also contributes to air pollution.

Summary:

Ilkley play park is really out of date now and could do with a wider range of play equipment to suit older and younger children
