		BRADFORD PROJECTED IN YEAR TOTALS	£286,000.00
ASSET MANAGEMENT			
		Aging assets can present an unmanaged business risk. Fatigue precipitates increased failure rates. Obsolete parts (taking longer to source) result in longer repair times which can compromise road safety and add to congestion problems. The structural deterioration of poles presents a significant risk to health and safety. Collectively, this builds an unmanaged financial risk. The pro-active response manages these risks through an asset re-newel program that builds toward a 'steady state' condition.
