<b>About You (Q21 to Q25)</b>	<b>27</b>

### About This Report

This Question by Question Analysis report provides a comprehensive analysis of the responses an authority's public have made to every question in the 2017 Survey.

The report mirrors the sequence of the Survey questionnaire and provides both a comparison of the authority's results with the results of all other authorities in the survey this year and a breakdown, in percentage terms, of the answers given to each question.

The report is structured on a question by question basis and shows the results and breakdown of responses in graphical format. Some of the results are shown using Weighted Data and some use Unweighted Data, these are shown as 'Weighted Data' or 'Unweighted Data' at the end of the graph description line.

### About Weighting

Weighting the data changes the sample profile to improve estimates of the attitudinal characteristics of the 'universe'. One of the circumstances where weighting is required is when there are variable response rates, for example from different sub-groups of the population. Weighting can be used to compensate for different levels of non-response in different sub-groups of the population. We use this weighted data to calculate your % Satisfaction Score.

Where we use Unweighted Data this shows a spread of answers chosen in response to that specific question and is not a calculation of % Satisfaction.

Full details of the NHT Weighting can be found in the Library Section of the NHT website at [www.nhtnetwork.org](http://www.nhtnetwork.org)

## Q1 How important, if at all, do you consider the following ...?

This graph shows your 'Importance' results for Question 1 and compares them with the average results of all other Authorities in the survey. Uses unweighted data.

This graph shows the percentage of respondents who selected each answer in Question 1. Uses unweighted data.
