Consistency with National Policy

## Please set out why you think the plan is sound ?

The Trust support the Policy on pedestrian and cycle movements especially in relation to the Airedale Greenway which includes the Leeds & Liverpool Canal towpath. The Airedale Greenway is identified as a strategic cycle and walking route on the policies map and the Policy requires that all development proposals adjacent to, or impacting on, key strategic routes will be expected to aid in the delivery of and contribute to an appropriate and proportionate level of public realm improvements to these routes.

It is important to recognise that new waterside developments place extra liabilities and burdens on waterway infrastructure and also provide an opportunity for this infrastructure to be improved. For example, increased usage of the towpath.

Such a policy approach is consistent with paragraph 114 of the National Planning Policy Framework (NPPF), which calls for local planning authorities to plan 'positively for the creation, protection, enhancement and management of green infrastructure. The canal and towpath are key components of green infrastructure.

Therefore, the policy is sound as it is consistent with National Policy.

**Please set out what change(s) you would consider necessary to make the Plan sound?**
