

Bradford Waste Management DPD: Main Modifications

Statement of Consultation

**Public Consultation
February 2017 – March 2017**

FORWARD

This Statement of Consultation relates to the public consultation that was carried out on the Main Modifications to the Bradford Waste Management DPD: Submission Draft in 2017 and the responses received as a result.

The Main Modifications consultation formed the final round of public consultation on the Waste Management DPD. The consultation sought to involve interested parties and stakeholders and invite representations on the draft modifications to planning policies and development allocations put forward by the council during the examination in public.

This Statement of Consultation provides a link between the representations received and how these have been taken into account and addressed in the DPD.

CONTENTS

1. Introduction and Background
2. Methods of Consultation and Events Programme
3. Schedule of Consultation Responses

LIST OF APPENDICES

- 1 Email and Notification Letter
- 2 List of Media and Press Releases relating to the Consultation
- 3 Summary of main issues raised through representations

1.0 INTRODUCTION & BACKGROUND

- 1.1 The Planning and Compulsory Purchase Act 2004 brought about a major change to the planning system, in particular to planning policy and how development plans are to be prepared. This means that the adopted Replacement Unitary Development Plan (RUDP) (2005) will, in time, be replaced by the Local Plan (previously Local Development Framework). The Waste Management DPD is being produced as part of the Bradford District Local Plan. When preparing documents which will form part of the Local Plan, the council must carry out public consultation and engage with local communities and stakeholders in order to gauge views on the plan and its soundness. The minimum requirements which all authorities must achieve are set out within the planning regulations.
- 1.2 Planning Authorities are also required to prepare and publish a Statement of Community Involvement (SCI) which explains when and how any public consultations will take place, who will be consulted and what will be done to engage with the community at each stage of the consultation process and also within planning applications. The council is fully committed to community engagement in the delivery of local services and functions. The SCI for Bradford was adopted by the Council on 8th July 2008.
- 1.3 This report contains details of the full consultation process carried out for the Bradford Waste Management DPD Modifications, a summary of representations received and how these representations have been taken into account in the preparation of the Waste Management DPD.
- 1.4 Section 2 of the report sets out the methods of consultation and the programme of events. Section 3 provides a summary of the main issues raised from the consultation responses. Section 4 sets out the next steps for how the Waste Management DPD will progress.
- 1.5 It is considered that this report provides a fair and accurate representation of comments, however some comments have necessarily been summarised. It should be noted that officers work from both these summaries and from the detailed full comments submitted to move forward to the next stage of the Waste Management DPD. Appendix 3 contains a summary of all representations and Bradford Council's responses to the representations received.

Purpose of this document

- 1.6 When preparing the local plan, the council must notify key consultation bodies and stakeholders of the subject of the local plan which the council propose to prepare, invite representations about what the local plan ought to contain and take into account any representation made.
- 1.7 This Statement of Consultation report sets out how the council has involved the community and key stakeholders in the preparation of the Bradford Waste Management DPD. It sets out what was done to consult the different organisations, agencies, and residents of the district, how this met the requirements of the regulations and how it complies with the council's adopted SCI. It also describes how the results of the consultations have been taken into account in preparing the next stage of the plan – Adoption.

Bradford Waste Management DPD

- 1.8 The Bradford Waste Management DPD is being produced as part of the Bradford District Local Plan. The Local Plan will be made up of a collection of planning documents that will guide future growth and development for the next 15-20 years. The DPD will set out detailed land uses and direct future development and investment.
- 1.9 There are a number of stages for preparation of the Waste Management DPD; these are highlighted in the list below:
- 1 Pre-production scoping and evidence gathering (2007-2008)
 - 2 Consultation on Issues and Options (2009 – 2010)
 - 3 Preferred Approach (2011)
 - 4 Preferred Approach – Revised Chapter 5 (2011)
 - 3** Consultation on Publication Draft (2015 / 2016)
 - 6 Submission to Secretary of State (2016)
 - 7 Examination**
 - 8 Adoption following an Inspectors report.
- 1.10 The Main Modifications consultation formed the final round of public consultation on the Waste Management DPD. The consultation sought to involve interested parties and stakeholders and invite representations on the key issues and emerging development options put forward by the council. This Statement of Consultation relates to the public consultation that was carried out for the Main Modification to the Waste Management DPD in 2017 and the responses received as a result.

2.0 METHODS OF CONSULTATION & EVENTS PROGRAMME

- 2.0.1 The Waste Management DPD presented a final draft plan with policies and proposed allocation sites for public consultation. It was the intention of the council to seek the views of key stakeholders, agencies, community groups and residents with regards to soundness of the policies and proposals presented within the DPD, along with the evidence base which supported the report.
- 2.0.2 Publication Draft Report was taken to the Council's Executive Committee for approval for public consultation, and subsequent submission to Secretary of State for Examination in Public and consultation on Modifications, on the 13th October 2015 and to Full Council on the 20th October.
- 2.0.3 In line with the SCI and requirements of the planning regulations, the Council undertook a planned six week public consultation on the Main Modification from February 2017 to March 2017. The consultation period started 15th February and finished on 29th March 2017, covering 6 weeks in total.

2.1 Consultation and Supporting Documents

- 2.1.1 The following documents were produced and made available for the Modifications consultation:
- Waste Management DPD: Schedule of Main Modifications
 - Bradford Waste Management DPD Main Modifications Sustainability Appraisal Addendum Report and Appendices
 - Bradford Waste Management DPD Main Modifications comment form
 - Bradford Waste Management DPD Main Modifications comment form guidance note.
- 2.1.2 Copies of the key consultation documents were placed for inspection at the following deposit locations listed below. Notifications of these locations were given in the consultation letter and on the council's website. Deposit locations were:
- Planning Offices in Bradford (Britannia House)
 - Ilkley Town Hall
 - Council One Stop Shop at Keighley
 - in the main local libraries in Bradford, Shipley, Bingley, Keighley and Ilkley

2.2 Who was consulted?

- 2.2.1 Approximately 1,800 stakeholders, members, groups and individuals were invited to make comments to the Schedule of Modifications. The table below indicates those persons or bodies consulted. These are organised in line with the SCI.

Consultees List	Number of consultees
Statutory consultees	100
Previous respondents to Bradford Waste Management DPD consultation	347
Other consultees	39
Councillors	90
LDF Notification List	1564
Total	2140

2.3 How the public and other stakeholders were consulted

- 2.3.1 The council used a number of different methods of community consultation and engagement which aimed to reach the different groups within the district. The ranges of methods used are outlined below:
- 2.3.2 A total of 2140 written notifications were sent out on Monday 13th February 2017, either by letter or by email, to individuals, community groups, developers, agents and infrastructure providers in line with the SCI, notifying them of the consultation, how to view the documents and inviting them to make comments before the set deadline. A sample of the letter can be found in Appendix 2.
- 2.3.3 The table below provides a summary of who was consulted and by what means.

Links to SCI	Consultee	Method of notification
Specific Consultation Bodies	Statutory Bodies	Letter and email
	Town & Parish Councils	
General Consultation Bodies	General Consultees	Email
Other Consultees	Other Consultees	Email
List of Other Organisations and Groups not identified in Planning regulations	Bradford Councillors	Email

	Previous respondents to DPD consultation	

2.3.4 The Council issued a press release in December following Council Executive approval for public consultation. A copy of this can be found in Appendix 2. Local news press / media provided coverage on the Modifications consultation. In particular, the Telegraph and Argus ran an article to highlight the draft plan and how to get involved for the local communities. The news article published can be found in Appendix 2. The following newspaper articles were published by the Telegraph and Argus, and Keighley News:

2.3.5 The **Council's local plans website** (www.bradford.gov.uk/planningpolicy) was used to facilitate communication of the consultation and the time period. Consultation documents were made available to view and download throughout the consultation process and details of the technical and area 'drop-in' events were advertised. Details of how people could comment on the consultation documents, along with a comment form and online survey were clearly provided. A copy of the webpage can be found in Appendix 2.

3.1.2 SCHEDULE OF WRITTEN REPRESENTATIONS

GENERAL COMMENTS				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
004	Chris Breen	<p>Me, 4 bins (one I pay for), recycling.</p> <p>My neighbours at 27 and 29, 2 green bins, everything, including garden waste, goes into them, and of course left out all day, everyday, blocking the footpath.</p> <p>You can plan what you want but until you sort out people like this it's a pointless exercise.</p> <p>C M Breen (Mr)</p> <p>Includes photographic evidence to show problems with wheelie bins outside residential properties</p>	The comments raised in this representation do not appear to relate to the proposed modifications or Waste Management DPD in general. Therefore these comments will not be addressed further in the Statement of Consultation.	No action taken.
005	Kenny Priestly	<p>How are people expected to lodge their objections on the proposed plan for an incinerator in the Aire Valley when the council's website is not fit for purpose?</p> <p>Many people are reporting long waiting times and having to constantly refresh pages whilst trying to lodge objections. Some people cannot even see the page whilst others are reporting the page timing out whilst only half way through writing their objections.</p> <p>What exactly do the council intend to do about this?</p>	The comments raised in this representation appear to be a general objection to the application on Site WM3. Therefore the comments will not be addressed further in the Statement of Consultation.	No action taken.
0013	Bingley Town Council	<p>AM20</p> <p>According to the text in Matter 6 of CITY OF BRADFORD</p>	The Council welcomes comments on Additional	No action taken.

GENERAL COMMENTS				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>METROPOLITAN DISTRICT COUNCIL BRADFORD WASTE MANAGEMENT DPD – EXAMINATION POINTS OF CLARIFICATION ARISING FROM COUNCIL’S RESPONSES TO THE INSPECTOR’S SCHEDULE OF MATTERS, ISSUES & QUESTIONS (24.11.16), Bradford Council states: The current application on this site submitted in August 2016 (16/06857/FUL) is a modification to the proposals in 2013 and 2015, and is for a conventional energy from waste plant and a waste plastics melting plant for biofuel. The pyrolysis plant has been removed from the proposal. The application remains undetermined.</p> <p>Therefore, surely the modification AM20 should read: Any enclosed recycling activity, Conventional Energy from Waste Facility. Mechanical Biological Treatment, Clean Material Reclamation Facility, Dirty Material Reclamation Facility, In-Vessel Composting Facility, Anaerobic Digestion Facility EXCEPT FOR Pyrolysis and Gasification Facility and Advanced Thermal Treatment.</p> <p>There needs to be absolute clarity about which processes are allowed at WM3.</p> <p>In addition, at the very least, the words <i>Pyrolysis and Gasification Facility</i> should remain and not been struck though or replaced by the phrase “ Advanced Thermal Treatment”. This latter phrase is a euphemism that makes the processes and their outputs sound more palatable than the reality.</p> <p>AM 1-5 Comment: residents in the Aire Valley were not sufficiently</p>	<p>Modifications and will make changes where it considers necessary. However, as these do not relate to soundness, the Council will not address these any further within the Statement of Consultation.</p>	

GENERAL COMMENTS				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>consulted on the implications of the waste management plan. It was not made clear that Bradford Council wishes to impose an unacceptably large incinerator in a semi-rural setting. The description of site WM3 on page 24 of the Waste Management Development Plan document (Nov 2015) does not indicate the scale of the development – and does not, in the mitigation, reference the site’s semi-rural location in a valley bottom. The lack of clear and accessible information provided by Bradford Council, that adequately conveyed the implications of the waste management proposals in a manner, language and through methods accessible to the majority of residents, should be noted in this modification.</p> <p>AM13 Replace the word “comprehensive” with “biased, secretive and unpublicised”. The phrase “short list of potential site allocations” should remain as there is no evidence or publicly available documents that show how the shortlist became allocated sites.</p> <p>AM 15 The word “shortlisted” should remain and not be replaced by “allocation” as there is no supporting evidence to show allocation in the case of site WM3.</p> <p>AM16 In the phrase “The following sites are identified as suitable allocations have been allocated for waste management facilities, with sufficient capacity...etc” The words “are identified as suitable allocations” should remain and not be replaced by “have been allocated” as there is no publicly available evidence or</p>		

GENERAL COMMENTS				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>documentation explaining allocation in the case of site WM3. 'there is no publicly available evidence or documentation explaining allocation in the case of site WM3'.</p> <p>Whilst, page 18 of the Development Plan refers to Site Assessment Report (January 2011), Revised Site Assessment Report (October 2011), docs which are presumably the basis of allocation, more details of the traffic light system and any consultation around these measurements are not provided.</p> <p>In addition, whilst CBMDC has approved planning permission for an incinerator on this site, WM3 had not been specifically allocated as a site and the planning approval may yet be called in by the Secretary of State for Communities and Local Government.</p>		
0036	Beverley Eastell	<p>I would like to make a further representation on the Bradford Waste Management DPD's proposed modifications. I understand that my first representation on the original Waste Management DPD is currently with the inspector.</p> <p>I would also like to make you aware that my original concerns and objections (email dated 23rd January 2016) for allocated site WM3 (site formerly 78) Aire Valley Road, still stand.</p> <p>I am also of the option that these proposed modifications are unsound in relation to their effectiveness, justification, positive preparation or consistency with National Policies NNPf/NNPW regarding site WM3. If either planning applications 13/04217/FUL (approved 2014) or 16/06857/FUL (granted but currently on hold) are to be built on this site, then these types of facilities will also be contrary in parts to the Waste Management Development</p>	<p>The Council welcomes comments on Additional Modifications and will make changes where it considers necessary. However, as these do not relate to soundness, the Council will not address these any further within the Statement of Consultation.</p>	No action taken.

GENERAL COMMENTS				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>Plan!</p> <p>AM20 Site WM3: (Positively Prepared & Consistent with National Policy NNP/NNP - unsound)</p> <ul style="list-style-type: none"> • Site WM3 is one of the 6 sites that have been identified as having the potential to accommodate different types of waste management facilities. Amendments have been made to the terminology text on the Waste Management DPD Schedule Major and Additional Modifications. Clarification needs to be made on the said amended text due to it now stating “Conventional” Energy from Waste Facility, processes Pyrolysis and Gasification having been crossed out and Advanced Thermal Treatment now added. • How does a “Conventional” EFW facility differ from a EFW facility? • If the processes Pyrolysis and Gasification are no longer permitted, then how is the process Advanced Thermal Treatment different? My understanding is there is no difference due to Advanced Thermal Treatment being a term applied to processes including Gasification and Pyrolysis. • Also, the Plastic Melting Plant proposed for Site WM3 will use fractional depolymerisation to produce diesel oil. The plastics will be made into a slurry before being heated to a high temperature (hydrous-pyrolysis). As the oil is 		

GENERAL COMMENTS				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>heated it enters a gaseous stage. So, technically this is a Pyrolysis and Gasification process and contrary to the Waste Management DPD modification AM20, SA objectives SA4 and SA5.</p> <p>Site WM3 Summary:</p> <ul style="list-style-type: none"> The Site is visually prominent and near two Bradford Wildlife Sites so neutral and uncertain effects have been recorded for this reason. I believe that both the significant positive effect and the minor negative effect are questionable due to the unlikelihood of rail freight coming to fruition anytime soon and the “minor” negative effect should be graded “major” negative due to the historical significance of East Riddlesden Hall being Grade 1 listed not Grade II*. Incineration, pyrolysis or gasification are proposed so with regards to the stack “how tall, is very tall” to mitigate the effects on the Natura 2000 sites? Also, will the proposed 60 metre (196.85 ft.) stack be adequate in this regard? Taking this into consideration, this site summary seems to be less than favourable in its traffic light grading regarding the suitability of site WM3 for incineration, pyrolysis or gasification. <p>If either planning applications 13/04217/FUL (approved 2014) or 16/06857/FUL (granted but currently on hold) are to be built on</p>		

GENERAL COMMENTS				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>site WM3 then such a facility will be:</p> <p>Contrary to the Vision and Waste Site Assessment objectives: SA2, SA3, SA4, SA5, SA6, SA7, SA8, SA9, SA10, SA11, SA12, SA15, SA18.</p> <p>Contrary to Policy W1: Cross Boundary Working Site Assessment objectives: SA2, SA3, SA5, SA8, SA9.</p> <p>Contrary to Policy W2: Bradford's Future Waste Capacity Requirements Site Assessment objectives: SA4, SA5, SA7, SA9, SA10, SA11, SA12, SA15, SA17, SA18.</p> <p>Contrary to Policy WDM2: Assessing All Applications for New, Expanded and Residual Waste Management Facilities Site Assessment objectives: SA3, SA4, SA5, SA7, SA9, SA10, SA11, SA12, SA15, SA16.</p> <p>Considering all the above, I feel that the proposed modifications, the suitability and the sustainability for an EFW facility on Site WM3 are unsound. It contradicts the Bradford Waste DPD and National Policies on numerous accounts and many questions are still to be answered.</p> <p>The proposed changes that I would consider in relation to the soundness of this plan would be a facility that wouldn't contradict the Waste Management DPD or National Policies. It wouldn't be detrimental to the environment, heritage assets or residents and would be a viable project, including greater employment</p>		

GENERAL COMMENTS				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>opportunities for locals.</p> <p>A “low level” enclosed recycling facility (with fitted solar panels) would be a good scenario. This type of facility would be more in keeping with its locality, it would limit personal gain and it moves waste management up the waste hierarchy but further assessments and mitigations would be needed with any scenario.</p>		
0095	Rachel Clarke-Wood Environment Agency	<p>We have the following comments to make.</p> <p>We queried the collected waste figures that had been provided and the double counting of these. We received confirmation from the LPA of the difference in LACW figure previously presented in the submission draft and the modifications of approximately 25,000 tonnes. It was confirmed this related to non-household waste as the LACW total includes 19,589 tonnes of C&I waste and 3,840 tonnes of CDEW. To avoid double counting, this figure was deducted from the overall LACW figure.</p> <p>We have no further comments to add to the modifications.</p>	Noted.	No action taken.

MM1				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
0036	Beverley Eastell	I am aware that, Bradford needs to take responsibility for the waste it generates by taking steps to manage that waste via sustainable	MM1 refers the insertion of new text in the Vision	No action taken.

MM1				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>waste management. I also understand the importance of moving the management of that waste up the waste hierarchy but the method of “other recovery” (EFW incineration etc.) isn’t the way forward.</p> <p>“Other Recovery” is only one step up from the bottom of the waste hierarchy (with landfill being the bottom) and is not an efficient or effective way of diverting waste from landfill. Local councils should be looking at ways to prevent, recycle and re-use waste rather than using incineration or landfill to dispose of it.</p> <p>It states in this modification “We aspire to achieve net self-sufficiency, managing the waste we generate at the nearest appropriate facilities”. Site WM3 is situated on the A650 Aire Valley trunk road, Keighley, which is 12km outside Bradford City Centre. Its location isn’t near any appropriate facilities nor any major motorways so the commercial and industrial waste that will be delivered to the site will travel via local road networks. These routes are already congested and depending on where these HGV’s originate from, the village of Saltaire, a World Heritage Site, will be the main thoroughfare. This could lead to significant heritage harm!</p> <p>It is proposed that approximately 70 HGV’s will enter and exit the facility between the times; 07:30 to 18:00 Monday to Fridays and 38 HGV’s 07:30 to 12:00 on Saturdays. That’s 6.6 movements per</p>	<p>relating to model shift in the transportation of waste arising’s and how this will aid in climate mitigation and adaptation. The comments made in the representation do not appear to address the new text, but instead appear to be an objection to the use of Other Recovery via Energy from Waste and the use of Site WM3 for a waste management facility.</p>	

MM1				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>hour during the week and an average 8.4 movements per hour on Saturdays. Using this type of waste transportation will significantly increase air pollution caused by transport fumes and this type of pollution is already at crisis point within the Bradford area!</p> <p>This is also contrary to the Addendum to Sustainability Appraisal Report objectives SA9: "Reduce nuisance caused to communities by waste transport" and SA3: "Reduce the District's impact on climate change and vulnerability to its effects".</p>		

MM2				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
0013	Bingley Town Council	<p>"To ensure that expansions to existing facilities where appropriate and new waste facility developments support the planned growth and waste needs of the Bradford community and are delivered in a manner which protects and enhances the District's environmental assets and safeguards human health"</p> <p>Add: if this is not adequately demonstrated by any proposed scheme then planning approval must be refused.</p>	The Objectives set out in the Waste Management DPD are to be achieved through the Planning Policies and Allocated Sites put forward within the document. The DPD contains Policies and Allocation Statements which safeguard	No action taken.

			environmental assets and human health, which will be used to refuse applications for development proposals which do not adequately demonstrate this safeguarding. The Council therefore do not consider this modification necessary.	
0041	Ian Smith, Historic England	MM2 Objective 3 - Sound The Glossary to the NPPF makes it clear that, in terms of the historic environment, "conservation" is the process of managing change to a heritage asset in a way which sustains and "where appropriate" enhances its significance. Therefore, in terms of the historic environment, enhancement should only be pursued where it is appropriate in order to better reveal the significance of that particular asset. Objective 3 amend to read:- "and, where appropriate, enhances the District's environmental assets"	The Council is of the opinion the enhancement of the Historic Environment should only be made where appropriate and thus the recommended modification shall be put forward.	"and, where appropriate, enhances the District's environmental assets"

MM3

Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
0036	Beverley Eastell	<p>At this moment in time Bradford doesn't have the "appropriate facilities" to deal with the increasing commercial and industrial waste that will arise in the area. But the greatest need for this waste stream after "prevention" is recycling and not "Other Recovery" (EFW incineration).</p> <p>The existing capacity gap for recycling commercial and industrial waste (plus LACW) is 444,225 tonnes which, is significantly greater than Energy Recovery at 102,346 tonnes. Only 1 new additional EFW facility would be required over the lifetime of the plan, whereas 4 new additional recycling facilities would be needed by 2030 due to the forecast waste arising being 572,863 (capacity requirements).</p> <p>Also, the Waste DPD Site Requirements Study allocated 6 suitable sites and all these 6 have been identified as having the potential to accommodate Conventional Energy from Waste and advanced thermal treatment facilities. Several of these sites (including site WM3) have also been identified as having potential to accommodate more than one type of waste management facility e.g. enclosed recycling plant etc.</p> <p>Taking these facts into consideration the planned building of a C&I</p>	<p>The Council's waste management hierarchy prioritises opportunities for the management of waste to be firstly prevented, reused and then recycled before 'other recovery'.</p> <p>For the Plan to be Effective, it must demonstrate sufficient flexibility to encourage delivery and allow for changes in circumstances. Allowing the widest range of waste management technologies on sites allows the Plan to be flexible enough to adapt to any future changes and will encourage the delivery of waste management infrastructure.</p>	No action taken.

0036	Beverley Eastell	<p>The Sustainability Appraisal Addendum Assessment Matrices, states that “The site has one significant positive effect, which relates to the site’s suitability for freight transport” (rail freight). Yes, the railway line does run to the South of the proposed site but this is the main commuter line that connects Leeds and Bradford to Skipton and vice versa. There are no viable infrastructures to transport waste via rail freight to this facility. Also, major constraints onsite including high pressure gas mains make it almost impossible for this mode of transport to be used.</p> <p>Due to the proximity of the railway line the developers have looked at this mode of transport as an alternative to road freight but the developers themselves state, <u>“this was not practicable or feasible for a number of reasons, including the relatively low volume of waste which may be sourced from various outlets and physical space on site which is further restricted by the number of constraints/standoffs for Northern Gas Networks infrastructure and Yorkshire Water Infrastructure”</u>. (source: Regulatory & Appeals committee public report pack. Paragraph 11.33 page 40). There may be a slight possibility in the future to use this as an alternative mode of transport, however I believe this is highly unlikely and certainly won’t be for many, many years, if at all. Taking this into consideration maybe this SA objective shouldn’t be</p>	<p>MM3 refers to the insertion of new text relating to the need to work collaboratively in promoting modal shift. The comments raised in this objection do not appear to address the modification but instead relates to an objection to the Site WM3 scoring positively in the SA for the potential to use rail freight in the transportation of waste.</p> <p>The Council is of the opinion Sustainability Appraisal has assessed the site correctly, with the potential transport waste to the site as a possibility and thus scoring positively.</p>	No action taken.

0003	Debbie Alstead	Further to the article in the Telegraph & Argus re feedback on Bradford's Waste Strategy, please can you tell me how the proposed Aire Valley Incinerator that was unanimously voted in favour for by Bradford Planning Officers, fits into your Waste	The Council is of the opinion that MM20 will enhance the visual, landscape and	No action taken.

MM20				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>Strategy exactly?</p> <p>My feedback to you for your Strategy is do not allow commercial and industrial waste with potentially toxic fumes, to be trucked in from outside the area when we don't know what it is and how it will affect the health and wellbeing of the local population, let alone damage house prices and tourism. Your Strategy should include a clause that does not allow incinerators to be built in the valley bottom where an 80 metre high chimney stack will churn out toxic fumes over the whole local population particularly those who live above the plume which means the smoke will be right in our faces. Your Strategy should ban all commercial and industrial waste, should ban large scale incinerators that do not benefit the local area, are not needed and potentially put in a totally inappropriate location. Local towns should have local recycling areas for household waste only, not industrial scale, non-identifiable potentially toxic waste that will be to the detriment of everyone who lives and visits here.</p>	<p>environmental safeguards put forward in the allocations statement to ensure significant detrimental impacts are avoided and enhancements sort through the development of Site WM3.</p> <p>The Council are of the opinion the contents of the allocation statement, in combination with the proposed modification MM20, address the relevant issues put forward in this representation.</p>	
0006	Tom Swift	<p>I object to the planning application ref: 16/06857/FUL.</p> <p>My objection is based on the following grounds; 1. Visual Impact of the Development. The proposed development is over a very large area. Multiple buildings are planned, some of which are huge, industrial complexes, which will have a detrimental impact on the area and the surrounding area.</p>	<p>This representation relates to an objection to the planning application on Site WM3 and not the Waste Management DPD. Taking this into account, the Council will not address the comments</p>	No action taken.

MM20				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>2. Adverse effect of the development on the setting of a nearby Listed Building. East Riddlesden Hall is a Grade 1 Listed Building. It is a mere 500m away from this proposed industrial complex. It is undeniable that the air pollution, visual eye sore and noise generated by this waste site will have a massive and negative impact on this listed setting. The setting of this historic building will not look good with a huge industrial building, large smoke stack, and plumes of toxic smoke flowing over it.</p> <p>3. Setting and Location. The proposal is on a valley floor. Natural air movements and wind directions will carry all odours/pollutants throughout all neighbouring towns/villages and over the dense nearby residential areas.</p> <p>The immediate vicinity is used for sporting and recreational activities. This development would have a huge negative effect on those activities.</p> <p>Please take into account the view of the 1000's of people objecting and decline this development.</p>	<p>raised within the Statement of Consultation.</p>	
0007	Petra Muff	<p>I am astounded that planning permission has even been considered for this incinerator in an area that is renowned for poor air quality and for trapped pollution within the valley due to the common temperature inversion here.</p>	<p>This representation relates to an objection to the planning application on Site WM3 and not the</p>	<p>No action taken.</p>

MM20				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>The fact that Endless Energy had to reapply for planning permission due to the fact that the incinerator wouldn't fit in the building in their original plan is extremely worrying. If they are this incompetent in their planning, it doesn't bode well for the safe management of a potentially dangerous plant.</p> <p>On top of these concerns, the extra traffic that would travel on the Bingley bypass and through Saltaire will have a large negative impact on the local area.</p> <p>Also, this planned building will be a huge eyesore in a beautiful valley.</p> <p>Please reconsider and reject this application.</p>	<p>Waste Management DPD. Taking this into account, the Council will not address the comments raised within the statement of consultation.</p>	
0008	Electricspark	<p>I think the energy plant which might be built in the Stockbridge area of Keighley should go ahead.</p> <p>Making energy from waste is an excellent idea. The site is next to the bypass on waste land. Any building on this site would be a great improvement. At the moment the site looks horrible and has done so for years.</p> <p>So please help the environment and the present eye soar by approving the plans. Please also allow for more wind turbine's in the whole of the Bradford area. Let's become the best low carbon area in the UK. Bradford was once the leading place in the world for technology. Let us be so again.</p>	<p>This representation relates to an objection to the planning application on Site WM3 and not the Waste Management DPD or specifically MM20. Taking this into account, the Council will not address the comments raised within the Statement of Consultation.</p>	No action taken.
0009	Mrs Boyes	<p>I write regarding the planned Aire valley incinerator. Firstly it is with utter dismay that efforts to inform the public on this matter</p>	<p>This representation relates to an objection to</p>	No action taken.

		<p>prior to its approval we're kept to a bare minimum. Please refrain from advising us that we should read the Keighley News. In this day and age do you really think this gets the message out, only 8k copies are purchased and the majority who buy it are elderly. In addition I understand you contacted under 1000 residents directly. Given the magnitude of this plan surely better efforts should have been made, even on a moral basis! Every house that has to look at it or see it's plume should have been consulted. I'm sure you feel you met the required standard however, you alone are responsible for the thousands and thousands and thousands of residents left completely unaware until it was passed.</p> <p>I was walking in the grounds east Riddlesden hall this week along the river with my children. I'm sorry but a few trees aren't going to save this place from the proposed monster. How dare you take this from us.</p> <p>You have washed your hands regarding health concerns of the local population, demonstrating a total disregard for what think, dismissing these concerns as not your issue given you are there to consider our interests is frankly harmful.</p> <p>This will absolutely effect tourism visual amenity will be disastrously effected, let's face it it's ugly and thousands will have to look at it, it's next to a school and you may as well close Marley playing field, would you take your children there, I won't be.</p>	<p>the planning application on Site WM3 and not the Waste Management DPD or specifically MM20. Taking this into account, the Council will not address the comments raised within this document, but will instead be addressed in the assessment of the planning application.</p> <p>The Council are of the opinion the Policies and Allocation Statement put forward within the Waste Management DPD are sufficient to avoid the detrimental impacts raised in this comment and seek enhancements where possible and appropriate.</p>	

MM20				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>More HGVs going through Saltaire, a national heritage site... perfect!!!</p> <p>Frankly this project completely contradicts your own waste management policy. Disgraceful.</p> <p>Why not plan this near the m606. Already industrial, good networks... not at the bottom of a valley which has regular temperature inversion, or next to a school or where there are thousands of residents or where there are playing field or near a national trust site or where the toxic air will plume over many primarily schools, or where respiratory issues are already rising... the list of complaints is endless.</p> <p>Also please give definite clarity on the obligation to employ local people... which will be permanent. This is widely assumed as misleading.</p> <p>You have been very disrespectful and caused harm to the community already in this process.</p> <p>Something of such magnitude which effects the community far and wide should have been contacted directly as part of the consultation process, the Keighley News cannot be relied upon. It is no wonder your website constantly crashes, imagine how many objectors there would be if your system was adequate.</p>		

MM20				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>Sadly you have done very little to demonstrate the positives of this, you don't even know what they will be burning.</p> <p>I am planning to take my professional skills and my children out of the area because of this as are many others. Shame on you.</p>		
0010 0011	Liaquat Ali Khan Parveez Ahmed	<p>I am opposed to the location of AWM and any proposed extension of the Waste Plant. The odour has caused me and my neighbours a great deal of distress and frustration. The company's activity is adversely impacting on health and wellbeing of all the local community. The smell is often strong enough to make us ill. Due to the repugnant stench my family and I are often unable to use our garden, hang our washing out or even open a window.</p> <p>For this reason we feel that this kind of industry and facility should be managed in a location where it would not impact on members of the public. It is better suited to an industrial complex and not a residential location. The area has schools, shops and places of worship. The health of thousands of local tax paying citizens should be of a higher priority than the profit of a misplaced management site.</p>	<p>This representation relates to the Associated Waste Management (AWM) facility in Victoria Works, Barnard Road, Bradford.</p> <p>MM20 does not relate to this facility and thus the comments raised within this representation will not be addressed further within this document.</p>	No action taken.
0012	Jennifer Kershaw	<p>I am writing to object against the incinerator planned for Keighley.</p> <ol style="list-style-type: none"> 1. I am very concerned about the health of anyone who will be breathing the toxic air pollution, especially as it is in a valley. 2. I feel that Keighley has been chosen because it is a deprived area where many local residents will not resist the development. 3. There will not be enough long term jobs created for local 	<p>This representation relates to an objection to the planning application on Site WM3 and not the Waste Management DPD or specifically MM20. 		<p>people.</p> <p>I was born in Bradford and have lived away since the age of 18 for approximately 15 years. I moved back 7 years ago when I started a family to be close to my parents, and because I really want Bradford to 'work' and improve, in spite of national opinions about Bradford. I have been very positive about hopeful about Bradford, but I was already regretting the decision to move back before the incinerator plans. Now I feel devastated and disgusted with the council. Bradford offers very little for 'middle-class' working families and therefore people rarely choose to move here, and frequently choose to move away. Surely the council need these families to pay the council tax and spend money in the area. I realise Bradford Council has many problems to deal with but the current spending plan is driving people like me away. Please reconsider the plans for the incinerator. This will devastate the area.</p>	<p>address the comments raised within this document, but will instead be addressed in the assessment of the planning application.</p> <p>The Council are of the opinion the Policies and Allocation Statement put forward within the Waste Management DPD are sufficient to avoid the detrimental impacts raised in this comment and seek enhancements where possible and appropriate.</p>	
0012	Jennifer Kershaw	<p>The major modification does not take account of the Habitats Regulations Screening Assessment report dated June 2012 which recommended that the site is not used for any purpose that emits pollution to air, such as from an incinerator, gasification or pyrolysis plant because of the detrimental effect such processes would have on vegetation communities of the South Pennine Moors (e.g. Rombalds Moor).</p>	<p>The Council are of the opinion MM20 addresses the issue of any potential significant detrimental impact upon the SAC / SPA through the needs for a project level Appropriate Assessment (AA) if it is determined by</p>	<p>No action taken.</p>

0013	Bingley town Council	<p>According to the text in Matter 6 of CITY OF BRADFORD METROPOLITAN DISTRICT COUNCIL BRADFORD WASTE MANAGEMENT DPD – EXAMINATION POINTS OF CLARIFICATION ARISING FROM COUNCIL’S RESPONSES TO THE INSPECTOR’S SCHEDULE OF MATTERS, ISSUES & QUESTIONS (24.11.16), Bradford Council states: The current application on this site submitted in August 2016 (16/06857/FUL) is a modification to the proposals in 2013 and 2015, and is for a conventional energy from waste plant and a waste plastics melting plant for biofuel. The pyrolysis plant has been removed from the proposal. The application remains undetermined.</p> <p>Therefore, surely the modification AM20 should read: Any enclosed recycling activity, Conventional Energy from Waste Facility. Mechanical Biological Treatment, Clean Material Reclamation Facility, Dirty Material Reclamation Facility, In-Vessel</p>	<p>The Council are of the opinion the wording put forward within the Allocation Statement is clear to what facilities are considered an appropriate on the site.</p> <p>The use of the terms “Pyrolysis” and “Gasification” are considered restrictive and the insertion of “Advanced Thermal Treatment” is considered</p>	No action taken.

MM20				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>Composting Facility, Anaerobic Digestion Facility EXCEPT FOR Pyrolysis and Gasification Facility and Advanced Thermal Treatment.</p> <p>There needs to be absolute clarity about which processes are allowed at WM3.</p> <p>In addition, at the very least, the words <i>Pyrolysis and Gasification Facility</i> should remain and not been struck through or replaced by the phrase “ Advanced Thermal Treatment”. This latter phrase is a euphemism that makes the processes and their outputs sound more palatable than the reality.</p> <p>MM20</p> <p>Visual and landscape assessment would be required due to the sites visibility and prominence within the area. Visual improvements to the site should be sought through its redevelopment;</p> <p>The potential effects of a Conventional Energy from Waste Facility and Advanced Thermal Treatment on the SAP and/or SAC will need to be assessed through a project level Appropriate Assessment (AA) if it is determined by an appropriate body that such an assessment is required .”</p> <p>The words “if it is determined by an appropriate body that such an assessment is required” should be deleted/struck through. Given, the SAP/SAC status of surrounding countryside, an AA should be carried out as a matter of course, without need for a determination of its requirement by an appropriate body (reference: Article 6(3) of the European Habitats Directive).</p>	<p>more flexible and thus ensuring the plan is Effective.</p> <p>The Council consider the requirement for an applicant to submit project level Appropriate Assessment without it being determined as necessary by an appropriate body as onerous and thus be over-burdened by the combined requirements of planning policy expectations, contrary to the NPPF (Para 21).</p>	
0036	Beverley	A landscape assessment would be welcomed for Site WM3 due to	The Council are of the	No action taken.

MM20				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
	Eastell	<p>the sites visibility and prominence within the area. The site in question is situated on the A650 on the edge of Keighley's industrial area. It is a brownfield site but much of the surrounding area is green belt. Agricultural land with large pockets of residential housing nestle on the valley sides. These residential areas will have a clear view of the EFW facility due to the main building being 35 metres (114.82 ft.) high, this is 5 metres higher than the skeletal frames of the neighbouring gasometers, which are due to be demolished soon. The 60 metre (196.85 ft.) chimney stack plus the 80 metre (262.46 ft.) plume will also be prominent and will be clearly visible from many a vantage point. The height, mass and industrial façade of the proposed development is totally out of character with this locality and will have a detrimental effect on the landscape.</p> <p>A HRA screening assessment has been undertaken regarding the potential impact Advanced Thermal Treatment (pyrolysis & gasification) and Conventional Energy from Waste (incineration) would have on the South Pennine Moors SPA/SAC (locally called Rombald's Moor). Acid deposits on this part of the South Pennine Moor are already in excess of the critical load. The assessment concludes that if combustion processes were to be used for waste management then they could have a significant effect on this part of the moorland and building such facilities on site WM3 would potentially exasperate the current situation. Taking this into consideration, how can BMDC give planning applications 13/04217/FUL (approved 2014) or 16/06857/FUL (granted but currently on hold) approval for Site WM3? It clearly contradicts</p>	<p>opinion MM20 addresses the issue of any potential significant detrimental impact upon the SAC / SPA through the needs for a project level Appropriate Assessment (AA) if it is determined by an appropriate body that such an assessment is required.</p> <p>The Council considers the issues raised within this representation are currently covered under 'Mitigation Measures' within the Site Allocation Statement for Site WM3 (Formerly Site 78). 0036	Beverley Eastell	<p>SA4: “Safeguard and improve air, water and soil resources and reduce the number of people affected by noise and dust from waste management sites”. (Positively Prepared & Consistent with National Policy NNPf/NNPW - unsound)</p> <ul style="list-style-type: none"> Objective SA4 states that the A650 “may act as a physical barrier, preventing any runoff from the site entering the River Aire”. This would be a positive point if only this was the case. Yorkshire Water deem the discharge of onsite surface water into the combined sewers unacceptable, so this means that the surface water will be collected before being pumped into the River Aire! To do this the developers plan to take the pipework under the Aire valley Road (another cause for major disruption) along a lane next to Marley Activity Centre and then discharge it into the river. This could lead to severe environmental issues due to possible contaminants getting into the watercourse. Not to mention pumping directly into the part of the River Aire that clearly floods (Boxing Day 2015 for example). If you consider the extra volume of water that will be discharged, 	<p>The comment raised in this part of the representation appears to specifically relate to the details of the planning application on Site WM3, and thus will not be addressed further in the Statement of Consultation.</p>	No action taken.

Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>& Positively Prepared - unsound)</p> <ul style="list-style-type: none"> • Please see above Modification MM5 Policy W1. <p>SA11: Improve the quality of the built environment, protect and enhance historic assets and make efficient use of land. (Positively Prepared & Consistent with National Policy NNPf/NNPW - unsound)</p> <ul style="list-style-type: none"> • My understanding is that the site is brownfield and lies within the Keighley urban area, not a greenfield site that lies within the Bradford urban area like stated in the Sustainability Appraisal Addendum Assessment Matrices. Also, the listed building stated is a Grade 1 listed building not a Grade 2 listed building like mentioned in the site summary. As you can appreciate, Grade 1 listed buildings are of exceptional interest and have more historical significance than a Grade 2 listed building so much so that only 25% of listed buildings are Grade 1. It is also not situated on the other side of the A606 Motorway but situated on the other side of the A650 Aire Valley Trunk Road. <p>SA12: Avoid, protect and enhance historic assets. (Consistent with National Policy NNPf/NNPW - unsound)</p> <ul style="list-style-type: none"> • East Riddlesden Hall, a Grade 1 listed building (see above) is situated across the A650 Aire Valley Trunk Road, it may not be within 250m of the site but it is less than 500m 	<p>the Sustainability Appraisal (SA) in light of the comments raised, and reissued the document with an Erratum Sheet inserted cover the changes made to address these issues.</p> <p>The Council are of the opinion the amendments made to the SA do not result in a material change to the results of the Sustainability Appraisal; therefore, the recommendations put forward are still valid.</p>	

SUSTAINABILITY APPRAISAL				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>away. Due to the vast scale of the proposed development and the visual prominence of the site, there is a great risk of negative visual impact on East Riddlesden Hall. There may also be a risk of erosion to the aged stonework due to the increase of pollution from the extra HGV's and stack emissions. East Riddlesden hall should be protected against heritage harm but I feel that such harm will be caused to this historically significant building and its setting if incineration and pyrolysis/gasification facilities are to be built!</p> <p>The potential for redevelopment to improve the quality of the site is achievable but an EFW facility isn't the way forward.</p> <p>SA15: Avoid impacts on open space, cultural, leisure and recreation opportunities: (positively Prepared – unsound) This objective states that the site is within “the Bradford urban area yet objective SA4 states that it is “located at the edge of an industrial sector of the Keighley urban area” (the latter being correct). Also, mentioned before, the site is situated near the A650 Aire Valley Trunk Road and not the A606 motorway. This objective also states that “No sensitive receptors within the immediate vicinity have been identified”. Yet Marley Activity Centre/King George V Playing Fields (bylaw protected) are directly opposite the site (across the A650). People from all walks of life, throughout the seasons, use this centre and enjoy its open space. It is also the setting for Keighley’s Annual Agricultural Show and other organised</p>		

SUSTAINABILITY APPRAISAL				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		events. So why hasn't this been identified as a sensitive receptor? If the planned EFW facility goes ahead then this will have a negative effect on this leisure and recreation facility and the wider community. I believe the grading of "neutral" effect should be reconsidered and graded negative instead!		
0083	Ros Brown	<p>1. I do not consider this plan to be 'legally compliant' as the volume and complexity of the documents and grounds for representation and associated forms have not been made sufficiently accessible to the members of the public affected by the development of site WM3. Arguably they have not been effectively consulted as per Bradford's Statement of Community Involvement, 2008. In the light of this it is not acceptable for there to be a question mark in SA7 of the Addendum to Sustainability Appraisal Report - Assessment Matrices.</p> <p>2. The 'legal compliance', thoroughness and reliability of this Plan is also called into serious question by the heading on P3 of the Modifications SA Addendum document where it refers to the 'Cambridge Local Plan' instead of the Bradford Local Plan. How many other errors are there in the Plan which have slipped in</p>	<p>The Council is of the opinion the public consultation has been carried out in conformity with Regulation 18 and 19 of the Town and Country Planning Regulations (2012) and the Council's Statement of Community Involvement (SCI). Copies of the Statement of Consultation for each stage of production can be found on the Council's website.</p> <p>This is a typographical error and will be corrected.</p>	No action taken.

SUSTAINABILITY APPRAISAL				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>unnoticed with long-lasting consequences for the District?</p> <p>3. I consider this plan to be unsound in that it has not been 'Positively Prepared' with regard to sustainable development and objective assessments and to this extent cannot be said to be 'Justified' or 'Consistent with National Policy' as there are other alternatives regarding the development of Site WM3 which would support sustainable development in accordance with NPPF and specifically NPPW policies (Sections 5 and 7). This is for the following reasons.</p> <p>The reference in SA6 of the Assessment Matrices regarding site WM3 states "It is unlikely that the redevelopment of this site will contribute to the achievement of BAP targets, unless, through ecological assessment, it was identified that the site contains BAP resources which could be enhanced through the development. The plan has been strengthened to include the requirement for consideration of potential impacts on the river corridor (the SAP and/or SAC) through a project level Appropriate Assessment (AA) if it is determined by an appropriate body that such an assessment is required. No opportunity for enhancement of biodiversity has been identified; therefore a neutral impact is defined." This does not take into account that such a project level AA was undertaken following inadequate information regarding the site in</p>	<p>The Council have consulted on number of long and short listed sites through the production of the Waste Management DPD, with the Site Assessment Report detailing the consideration and assessment of alternative sites.</p> <p>The Council has taken account of the HRA Assessment of Site WM3 in the production of the Waste Management and are of the opinion the issues raised within this representation are currently covered under 'Mitigation Measures' within the Site Allocation Statement for Site WM3</p>	

SUSTAINABILITY APPRAISAL				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>the June 2012 Habitats Regulation Assessment and reported in the following HRA (November, 2012: Para 6.2). The report's conclusions are as follows regarding Site WM3 (Former Site 78). 'In conclusion, the findings of this air quality modelling exercise suggest that although the addition of the emissions from a combustion based waste facility would be relatively small, acid deposition is already in excess of the critical load for this part of the South Pennine Moors SPA/SAC (Rombald's Moor) and therefore a combustion based waste management use on proposed Site 78 of the Bradford Waste Management DPD would potentially exacerbate an existing situation. <i>With regards to impact avoidance measures, it is therefore suggested that proposed Site 78 of the Bradford Waste Management DPD may not be suitable for a waste management use which uses combustion processes and it is recommended that the Bradford Waste Management DPD is amended to reflect that this use should not be identified as being suitable for Site 78.</i> (Para 6.2)</p> <p>1. To make this plan 'legally compliant' an adequate and accessible consultation should be undertaken with local residents and users/managers of heritage and SPA/SAC sites to minimise the uncertainty relating to Sustainability Appraisal Objective SA7.</p> <p>2. To make this plan 'legally compliant' the Modifications SA Addendum document and the Waste Management DPD should be thoroughly checked and corrected to ensure it reflects the Bradford and not Cambridge Local Plan.</p> <p>3. To make this plan 'sound' the Sustainability Appraisal Objectives</p>	<p>(Formerly Site 78) (including the proposed modifications). This is further reinforced through Policy WDM2 which stipulates all Proposals for all waste management facilities (whether new, expanded but excluding landfill schemes) will be permitted provided that it can be demonstrated that any impacts of development will not significantly adversely affect people, land, infrastructure, natural resources and the historic environment.</p>	

SUSTAINABILITY APPRAISAL				
Rep ID	Name / Organisation	Summary of Representation	Council Response	Action(s) Required
		<p>SA4, SA5, SA6, SA11, SA12 and SA15 must all be updated to reflect the HRA (November, 2012) conclusions that this site is not suitable for combustion based waste management. These should now be shown in red as 'Significant Negative's.</p> <p>4. To make this plan 'sound' MM20 should now be updated to reflect the project level AA and read</p> <p>'The potential effects of a Conventional Energy from Waste Facility and Advanced Thermal Treatment on the SAP and/or SAC have been assessed through a project level Appropriate Assessment (AA) and the Bradford Waste Management DPD has been amended to reflect that this use should not be identified as being suitable for Site WM3.'</p>		

Bradford Waste Management DPD: Modifications Consultation
(February 2017 – March 2017)

Department of Place
Development Plans
4th Floor Britannia House
Hall Ings
Bradford
BD1 1HX

Tel: (01274) 433679

Email: planning.policy@bradford.gov.uk

Date: Wednesday 15th February 2017

Dear Sir / Madam,

LOCAL PLAN FOR THE BRADFORD DISTRICT

**• Waste Management Development Plan Document
- Proposed Modifications (REGULATION 18 & 19)**

I am writing to you as a statutory consultee or because of your previous interest in the Local Plan for the Bradford District. Following consultation on the Waste Management DPD Publication Draft the Council submitted the DPD to the Secretary of State on Monday 16th May, for examination in public by an independent Planning Inspector. The Secretary of State then appointed Mr Stephen Pratt BA (Hons) MRTPI to undertake the examination into the Waste Management DPD.

As part of the examination process a number of modifications to the Plan are now being proposed, which have been set out in the Schedule of Modifications available on the Councils website.

Aim of this consultation

As required under the Town and Country Planning Regulations 2012, the Council must now undertake a 6 week public consultation on the Schedule of Modifications.

Alongside the Schedule of Modifications, the Sustainability Appraisal Addendum will be published, which will detail the potential impacts of the modified policies.

It is important to point out at this stage that representations on the Modifications must relate to test of soundness (Positively Prepared, Justified, Effective and Consistent with national policy).

Following the close of the public consultation, the Council will produce a Statement of Consultation detailing what was undertaken, the responses received and a Council response to each representation.

The Council is keen to promote the submission of comments electronically and would encourage anyone with appropriate facilities such as email to make their responses in this way. Representations can be made using the Representation Form available online at www.bradford.gov.uk/planningpolicy or by email to the address planning.policy@bradford.gov.uk

As well as electronic representations the Council will also accept responses by post to Development Plans, City of Bradford Metropolitan District Council, 4th Floor, Britannia House, Hall Ings, Bradford BD1 1HX.

All comments should be with the Council by 3pm on Wednesday 29th March 2017.

Your personal details and comments cannot be kept confidential and will be published and submitted to the Secretary of State alongside each of the proposed modifications for public examination by an independent Planning Inspector.

Availability of Documents

All three development plans and supporting documents will be available to view on the Council's website at: www.bradford.gov.uk/planningpolicy.

Reference copies of each Development Plan Document together with the supporting documents listed will be available for inspection at the deposit locations listed below:

Development Plan Documents

- **Waste Management Development Plan - Schedule of Modifications**

Supporting Documents

Sustainability Appraisal Addendum
Statement of Representations

Deposit Locations

- **CBMDC Office:** Britannia House Reception, Bradford, BD1 1HX.
- **CBMDC libraries:** Bradford Local Studies Library, Bradford City Library, Shipley, Bingley, Keighley and Ilkley.
- **Town Halls & One Stop Shops:** Keighley and *Ilkley (**By appointment only*).

Should you have any further queries about the Development Plan Documents consultation process please contact a member of the Development Plans team by E-mail on planning.policy@bradford.gov.uk or telephone (01274) 433679.

Yours faithfully,

Andrew Marshall
Planning & Transport Strategy Manager

Appendix 2 - List of Media and Press Releases relating to the Consultation

The council issued a press released in February 2017 (below), inviting interested parties to comment on the modifications to the Waste Management DPD.

Have your say on the waste plan

Consultation has begun on modifications to the planning strategy into how the Bradford district will manage its waste for the next 15 years.

People have until March 29 to have their say on the Waste Management Development Plan.

When the consultation ends, an independent planning inspector will take account of representations before deciding if the plan is legally compliant.

If and when the inspector passes the plan it can be formally adopted by the Council's Executive and then the Full Council.

This will form part of the Council's Local Plan which is the planning blueprint for the district.

News Article – Telegraph and Argus – 10th February 2017

PLANS to allocate six new waste sites for the district will need to be tweaked, a Government inspector has ruled.

Bradford Council wants the district to make a "step-change in the way it manages its waste" by 2030 by dealing with its own rubbish instead of sending it to other parts of the UK and Europe.

But to do this, it needs to find 17 hectares of land for new waste facilities and has put together a document called the Bradford Waste Management Development Plan, setting out five suggested sites in Bradford and one in [Keighley](#).

Work has already begun on the latter site - the former gas works at Marley - where the company Endless Energy is building a controversial £135m energy-from-waste incinerator.

On Thursday, protesters gathered outside City Hall waving placards as the firm was given planning approval for a different design for its plant. A petition against the development also attracted 5,000 signatures.

The other proposed sites are:

- Vacant site, Princeroyd Way, Listerhills, Bradford - Existing skip hire depot, Ripley Road, Bowling, Bradford,
- Existing household waste site, Bowling Back Lane, [East Bowling](#), Bradford,
- Vacant site, Merrydale Road, Euroway Estate, Bradford,
- Existing scrapyards, Birkshall Lane, East Bowling, Bradford,

The sites could variously be used to divert rubbish from landfill by methods such as recycling, incineration, reclamation or composting.

The plan notes that most of Bradford's waste is currently either sent to other districts for disposal or sent to Europe to be used as fuel, once recyclables are extracted.

It says: "The current lack of recycling, treatment and residual management facilities within the Bradford district is a key factor in why much of the waste arisings from the district is currently exported."

The plan has been out to public consultation and has also been studied by planning inspector Stephen Pratt, who has now ruled that some adjustments will have to be made before the plan can be adopted.

The suggested tweaks are technical in nature, and make no change to the six proposed waste sites, but it means the plan will have to undergo another six-week public consultation.

Ad closed by Google

The consultation will run from February 15 to March 29.

A Council spokesman said only people who had taken part in the first consultation could participate, and that they would be contacted.

CONSULTATION has begun on modifications to the planning strategy into how Bradford will manage its waste for the next 15 years.

People have until March 29 to have their say on the changes to the Waste Management Development Plan.

When the consultation ends, an independent planning inspector will take account of representations before deciding if the plan is legally compliant.

If the inspector passes the plan, it can be adopted by the Council's executive and then the full Council. This will form part of the Council's Local Plan, the planning blueprint for the district.

Appendix 3 - Summary of main issues raised through representations

General Comments
A number of objections received relating to site WM3 not specifically relating to any specific proposed main modification.
MM1
The representation objects to the use of energy from waste in the waste hierarchy and a general objection to site WM3.
MM2
A number of representations relating to amending the modifications to Objective 3, relating to enhancements only where appropriate and if enhancements cannot be achieved applications must be refused.
MM3
The representation objects to the use of energy from waste in the waste hierarchy and a general objection to site WM3.
MM4
NO REPRESENTATIONS RECEIVED
MM5
The representation relates to a site receiving a “significant positive effect” for alternative modes of transport.
MM6 – MM19
NO REPRESENTATIONS RECEIVED
MM20
The representations relate to objections to site WM3 on grounds of emissions, HGV movements, design, landscape impact, habitats, biodiversity etc.
MM21
The representations relate to objections to the application on site WM3 and a comment regarding the need to refuse any application on site WM3 if the contribution to the national grid and a wider
MM22
The representation relates to a factual correction to the modification to take account of

the fact there is only one listed building to the west of Site WM4, not two as stated in the modification.
MM23 & 24
NO REPRESENTATIONS RECEIVED
MM25
The representation relates to an objection to site WM3 on grounds of air quality and noise impacts.
MM26 & MM27
NO REPRESENTATIONS RECEIVED
MM28
The representation relates to a factual correction to the modification to take account of the fact there is only one listed building to the west of Site WM6, not two as stated in the modification.
MM29 - 34
NO REPRESENTATIONS RECEIVED
MM35
The representation relate to a soundness issues regarding enhancement to the built environment and the fact the NPPF stipulates these should only be made where appropriate; suggested amendment to modification to make sound.
MM36 – 40
NO REPRESENTATIONS RECEIVED
MM41
The representation relates to a number of questions to the development of a waste facility on site WM3.
MM42
NO REPRESENTATIONS RECEIVED
MM43
One representation objects to the use of energy from waste in the waste hierarchy and a general objection to site WM3. The other representation relates to a soundness issues regarding enhancement to the built environment and the fact the NPPF stipulates these

should only be made where appropriate; suggested amendment to modification to make sound

MM44

The representation relates to an objection to collaboration with other local authorities if it results in waste being transported to WM3 from the sub-region and is contrary to SA Objectives SA9 and SA3.

Sustainability Appraisal

The representations relate to objections to Site WM3 and how the Sustainability Appraisal is unsound.
