

Email from Programme Officer re Policy EN7 hearing session 170516

This email is addressed to a modest number of representors, as listed below, who made recent representations concerning Policy EN7 Flood Risk with particular reference to the Council's proposed Main Modifications 127 and 128:

26 Ilkley Design Statement Group
54 Ilkley Civic Society
55 Cllr Hawkesworth
69 Addingham Civic Society
71 Sue Rix
75 Menston Action Group
77 Cllr Dale Smith

The Inspector has decided to have a short hearing session on this theme to be held on Friday 20 May and the purpose of this email is to enquire if you wish to participate. The agenda item is as follows:

Matter 4 Policy EN7 Flood Risk

Key Issue: Is the amended wording for the text accompanying Policy EN7 (paras 5.4.132 and 5.4.143) , as set out in MM127 and 128, appropriate, justified, effective, soundly based and consistent with the latest national policy guidance?

The wording of the proposed Modifications is contained within Examination library document PS/G004a pages 106-7 and the Council's responses to related representations are within document PS/G005 (listed on the Modifications webpage https://www.bradford.gov.uk/bmdc/the_environment/planning_service/local_development_framework/proposed_modifications.htm)

At this stage I am unable to give a firm indication of the precise timing on Friday as there is a possibility that Wednesday's Matter 3 session may overrun modestly and be resumed on Friday. However, if you intend to participate, I would ask you to be present by 10.00am at our Victoria Hall venue in Saltaire.

Your early response would be helpful to my preparations.

Thank you.

Tony
