No – 'unsound'

### 8. If you consider the proposed main modification to be 'unsound', please identify which test of soundness your comments relate to?

Positively prepared

Justified

Effective

Consistent with National Planning Policy (the NPPF)

### 9. Please give details of why you consider the proposed main modification is not legally compliant or is unsound in light of the main modifications proposed. Please be as precise as possible.

If you wish to support the proposed main modification please use this box to set out your comments.

(Please note: Your representation should cover succinctly all the information, evidence and supporting information necessary to support / justify the representation and the suggested change. It is important that your representation relates to the proposed main modifications).

I would like to object to the modifications - MM51 and MM52 in particular - on the basis that the increase in population for Wharfedale and Ilkley would not be supportable or sustainable without an adverse effect on the character of the area and the quality of life for people living there (e.g. increased congestion, increased pressure on local amenities such as local countryside). Removing a significant amount of the green belt will exacerbate this impact. In my view, the modifications are therefore not effective as they cannot be delivered in a sustainable way.

10. Please set out what changes you consider necessary to make the proposed main modification legally compliant or sound, having regard to the test you have identified at Q7 above.

You need to say why this change will make the proposed main modification legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Reduce the number of new houses planned for Wharfedale to the levels prior to the modifications as these levels are more likely to represent a sustainable level of increased population in the Wharfedale valley, particularly with reference to capacity of local infrastructure that would be needed to support the population. E.g. particularly roads, trains, schools and health care.
