9. Please give details of why you consider the proposed main modification is not legally compliant or is unsound in light of the main modifications proposed. Please be as precise as possible.

If you wish to support the proposed main modification please use this box to set out your comments.

(Please note: Your representation should cover succinctly all the information, evidence and supporting information necessary to support / justify the representation and the suggested change. It is important that your representation relates to the proposed main modifications).

MM127 The Group supports the inclusion of all forms of flooding including those associated with ground water in assessing sites for future development. Events during the winter of 2015-16 have clearly shown that numerous sites in Wharfedale identified in the SHLAA are unsuitable for development due to groundwater and other forms of flooding.

The Plan and Modifications are unsound since they fail to define, evaluate or justify the combined marginal effects of the combination of current strategy, Sites and current allocations on flood risks, both inside and outside the District.

10. Please set out what changes you consider necessary to make the proposed main modification legally compliant or sound, having regard to the test you have identified at Q7 above.

You need to say why this change will make the proposed main modification legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Plan and modifications establish that flooding issues will be considered during the Allocations DPD stage.

It is inappropriate for the Wharfe and the Aire valleys for the plan and modifications combined to omit a process to evaluate and understand the combined, marginal effects of the entire development strategy/allocations on the current problems. A comprehensive District-wide flooding study must be undertaken to clearly identify sites, and combinations of sites and allocations, with no marginal flood risks - or combinations which are acceptable with mitigation measures.
