

Business Gas Usage Data

Overview

As the UK starts to implement measure to produce less Carbon and achieve Net Zero

There is a big push for the UK to become totally independent of Gas imports, the following gas results have been adjusted for whether temperature with the aim of giving a balance picture of our usage.

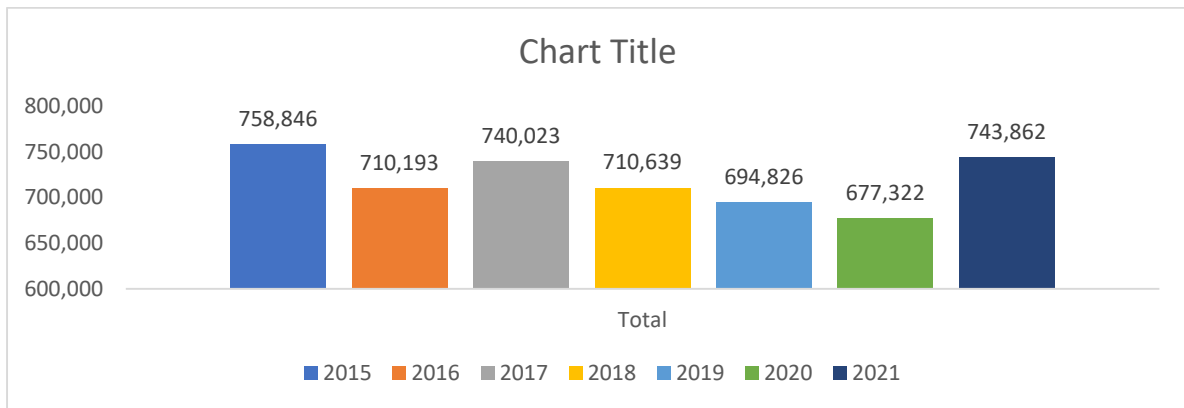

In addition to being reliant on gas for heating building the UK also uses a high amount of gas for cooking.

Presently 40% of electricity is also generated using Gas, the future changes intend to see more electricity being produced by other means including Wind and solar power.

Yorkshire and Humber Gas Usage 2021

The below table shows the averaged (MEAN) Business usage of a business gas meter for each borough in 2021. This is the latest data from the Government Statistics

Sum of Mean consumption	Column Labels
Row Labels	2021
Selby	6,555,004.4
North East Lincolnshire	2,496,923.0
Ryedale	1,737,213.8
Barnsley	1,492,422.9
North Lincolnshire	1,429,585.1
Hambleton	1,199,399.0
Wakefield	1,119,625.0
Doncaster	1,083,613.8
East Riding of Yorkshire	1,074,057.5
Rotherham	1,040,227.1
Kingston upon Hull, City of	785,283.8
Bradford	743,861.6
Scarborough	711,897.6
Kirklees	636,097.6
Richmondshire	625,153.2
York	600,344.2
Sheffield	577,001.2
Leeds	569,348.8
Harrogate	475,175.5
Craven	408,114.0
Calderdale	364,889.1

***The above graph shows the average usage of a business meter in Bradford over the years
This has already been weather adjusted.***

Additional information can be found on the attachments in this page

As you can see from the above graph BDMC businesses consumption of gas has not reduced despite the increase in costs, this will indicate very few affordable and viable alternatives to gas for businesses within BDMC.

Statistics

The present Gas data runs From Mid-May 2021 to 2022

Foot Notes

This data has been extracted from the Government Statistics webpage

The data is currently published annually, latest information from w the (Energy Efficiency Stats department) states “We haven’t pre-announced the next publication date yet, but this is likely to be end of December.”

Other statistics publications by the Department for Energy Security and Net Zero (DESNZ) can be found on the [DESNZ statistics homepage](#).

National Average Business consumption per meter for 2021

The table below shows the average consumption per gas meter in KWh, listed by local Authorities

The original data is taken from National Energy Efficiency Stats, with latest date running up to May 2021

Because gas is used for a variety of purposes for business it is hard to determine why one borough uses more gas than the other as this could be attributed by the following;

Gas for Heating Buildings and whether that building is adequately insulated to reduce consumption.

Business type i.e. Kitchens – Restaurants – takeaways – heavy industry etc

For example, the number of restaurants in a borough using gas to cook with on a daily basis could have a big impact of business gas usage.

Row Labels	Country or region	Up to May 2021
Birmingham	West Midlands	3,083.5
Westminster	Inner London	2,417.7
